*To the Officers and Gentlemen of the Vermont Medical Society:*

The Committee to whom was assigned the pleasant duty of attending the examinations of the Graduating Class of Burlington Medical College, respectfully report:

That we were present during the two days devoted to that purpose.

The Class numbered about twenty-six. We were very courteously received by the Faculty, and kindly invited to participate in the examinations. With a strong desire to test the results of their drilling, we heartily entered into the arrangement, and must say in justice to all, that we were abundantly satisfied with the zeal and proficiency shown by a majority of the Class. The examinations were conducted in a manner which clearly indicated to your Committee a determination on the part of the Faculty to elevate the standard of requirements for graduation.

We feel it incumbent upon us at this time, in view of the many improvements visible on every hand, and the material progress which the School has made in the last ten years, to commend it anew to your especial favor, as an Institution in the success of which we cannot feel too keenly interested. Let us second the efforts of an able Faculty, and while appreciating the work they are engaged in, heartily co-operate with them, and contribute everything in our power to make our own Vermont Medical College a source of pride to the profession.

Respectfully submitted,

H. S. BROWN, }  
A. D. TAGERT. } *Committee.*

Approved, H. D. HOLTON, *President.*
